

```
#1. Enumerate a python list and try to print the counter with the list value.  
my_list = ['Rahil','Mohit','Mayur','Faiz','Mayank']  
print(list(enumerate(my_list)))  
print(enumerate(my_list))
```

**Output: -**

```
[(0, 'Rahil'), (1, 'Mohit'), (2, 'Mayur'), (3, 'Faiz'), (4, 'Mayank')]  
<enumerate object at 0x00000152C3CD4A40>
```

```
#2. Enumerate a python tuple and try to print the counter with the tuple value.  
my_tuple = ('Rahil','Mohit','Mayur','Faiz','Mayank')  
print(tuple(enumerate(my_tuple)))  
print(enumerate(my_tuple))
```

**Output: -**

```
((0, 'Rahil'), (1, 'Mohit'), (2, 'Mayur'), (3, 'Faiz'), (4, 'Mayank'))  
<enumerate object at 0x00000152C3CD4A80>
```
